EDUCATION

MEng, Flight Vehicle Design and Engineering (Astronautics)

Sept 2020 – Nov 2023

Beihang University (Beijing, China)

- GPA: 3.78/4.00
- Relevant coursework: Structural Analysis and Optimization, Object-oriented Programming, Statistics
- Award:
 - Full Chinese Government Scholarship by the China Scholarship Council (CSC)
 - Distinguished Foreign Student Scholarships of Outstanding Performance at Beihang University (Second Prize) for the year 2021

BEng, Flight Vehicle Design and Engineering (Astronautics)

Sept 2016 – July 2020

Beihang University (Beijing, China)

- GPA: 3.71/4.00 (Ranking: 5/70)
- Relevant coursework: Probability and Statistics, Linear Algebra, Spacecraft Design Optimization, Practice of Artificial Intelligence
- Award and Honor:
 - Excellent International Graduate of Beihang University of the year 2020
 - Excellent Thesis (School of Astronautics)
 - Chinese Government Outstanding International Student Scholarship of the year 2019
 - Distinguished Foreign Student Scholarships of Excellent Study at Beihang University (First Prize) for the year 2017–2019

RESEARCH EXPERIENCE

Parameter Updating for Digital Satellite Model via Data Mining Approach

June 2021 – Nov 2023

Key Laboratory of Spacecraft Design Optimization and Dynamic Simulation Technologies

Advisor: Professor Yunfeng DONG (Master's Thesis)

- Leveraged NLTK library and text mining techniques to analyze the text similarity of the ontology-based satellite parameters obtained from web-crawled open-access journal articles
- Constructed a Neo4j knowledge graph containing the ontology-based satellite parameters and their node similarity, correlation, and sensitivity
- Utilized data mining and graph reasoning algorithms (i.e., Jaccard node similarity, PageRank centrality, and Louvain community detection) to select and divide digital model parameters into groups based on their importance in the knowledge graph
- Performed parameter identification and updated the selected digital satellite model parameters group-wise using nonlinear least square methods

Satellite Collision Risk Analysis based on Data Mining

Jan 2020 – June 2020

Key Laboratory of Spacecraft Design Optimization and Dynamic Simulation Technologies

Advisor: Professor Yunfeng DONG (Undergraduate Thesis)

- Analyzed and predicted the collision risk of satellites by employing data mining techniques, including KMeans clustering and Random Forest classification, based on orbital data web-crawled from the CelesTrak website
- Developed a GUI using PyQt5 to automate the entire analysis process and generate an analysis report

Handwritten Digits, Alphabets, and Symbols Recognition Model

Apr 2019 – June 2019

Practice of Artificial Intelligence course delivered by Microsoft Research Asia

- Developed a convolutional neural network recognition model of handwritten digits, alphabets, and math symbols
- Developed a calculator GUI that solves handwritten mathematical equations on a touchscreen pad

SKILLS & LANGUAGES

Skill	Python (Pandas, Numpy, Matplotlib, Scikit-learn, TensorFlow, PyTorch, PyQt, OpenCV, NLTK), MATLAB (Simulink, GUI), C, C#, Cypher, Java, LaTeX, Android, Arduino
Software	SolidWorks, AutoCAD, STK, Adobe Illustrator, Neo4j
Language	Fluent in English (TOEFL 106, IELTS 7.5), Mandarin, Malay, Cantonese

WORK EXPERIENCE

Technical Marketing Engineer (Internship)

Apr 2019 – Jan 2020

Beijing Aerospace Measurement & Control Technology Co., Ltd.

- Conducted market research and communicated with aerospace-related companies and universities in Southeast Asia led to future cooperation opportunities
- Based on in-depth knowledge of aerospace technology, translated three company catalogs and product manuals from Chinese into English that serve as a basis for other language translation versions. These translated product manuals were used on a business visit to Russia and indirectly helped to win several collaboration contracts.

Popular Science Editor (Internship)

July 2018 – Sept 2018

Shaoniantoutiao Technology Co., Ltd.

- Wrote popular science articles related to cutting-edge high-tech, including aerospace, using easy and understandable language for children

ADDITIONAL ACTIVITIES

Member of the Design Department

Feb 2018 – July 2023

International Student Press Centre of Beihang University

- Edit and typeset WeChat articles regarding campus events using the Xiumi website

Class Monitor

Sept 2016 – June 2020

International Undergraduate Students of the year 2016

- Provided assistance to classmates and solved their problems and questions

Director of Media Wing

Oct 2016 – Apr 2018

Beihang International Scientific Society

- Spread awareness of science and advertise scientific activities organized by the society on the campus
- Managed and operated four departments (Design, Website, Video, and Writer)
